Celebration banquet SLC

february

- o 2/14 LED Product Showcase
Sponsored by:
U of U Architecture Dept.

november IES meeting

Presentation by Dawn De Grazio L.C., on Tuesday, November, 15th at 12:00 p.m. at the Downtown Holiday Inn (999 South Main Street). Dawn De Grazio, LC will be presenting the **"The Up and Down of Indoor Lighting"**. Topics including: How much upright should my luminaire have? There are a great many factors that impact the answer. This seminar will cover the many considerations that go into determining the proper amount of upright and downlight needed from a luminaire.

Dawn De Grazio brings to us a wealth of knowledge with a BS in Architectural Engineering, a graduate of the Dave DiLaura's well-respected Illumination Engineering program at the University of Colorado and as one who participated in authoring the "Quality Lighting and Industrial Lighting" chapters in the new IES handbook. We look forward to hearing her presentation. This presentation is registered for 1.0 HSW Learning Unit from the AIA.

The fee required to attend this presentation is \$20.00 lunch is included. Please RSVP to Tom Phelps at 328-8745, tom@dmatl.com.

NCQLP (LC) exam

Examination date is November 5, 2005. You can obtain information from the following link: <http://www.ncqlp.org/>

membership recruiting awareness

As your membership chair I wanted to let everyone know that the local section is very appreciative to all of those who have and continue to support the IES. We are very aware of busy schedules and are fortunate when you are able to attend the meetings. All of those on the committee work very hard to keep the section moving along and provide educational monthly meetings.

To keep the section moving along I would ask that you invite a co-worker or at least make sure all of those in your office receive the monthly newsletter. You will have *more success* in getting a co-worker in your office to attend than any of the section officers. The section depends upon new members but more so when experienced members are able to attend.

Please contact Richard Weight (membership chair) at rweight@holophane.com for additional information or visit the web site at www.iesna-utah.org

IESNA centennial celebration

How it Began!

"On the evening of a bright, clear day, December 21, 1905, as the sparkling arc and gas lamps did their part to suggest Christmas gaiety, a group of 25 businessmen met at The Hotel Astor on Times Square, New York. Their purpose was to discuss a novel idea and to enjoy an excellent one-dollar dinner."

To find out more please read the entire article from the January 1956 issue of Illuminating Engineering titled "[The Society's First Year](#)".

"I believe that much good will result from free exchange of ideas between those who are identified with this special branch of engineering" (L.B. Marks 1905)

IESNA utah centennial celebration banquet(SLC)

To celebrate 100 years of the IES we will be hosting a Centennial celebration banquet on Monday, January 10. Please watch further issues of the newsletter for more information.
